Shorebird Ecology, Conservation, and Habitat Management Workshop

Chaplin, Saskatchewan
May 31 - June 2, 2016

Hosted by:

Nature
SASKATCHEWAN

This workshop will focus on shorebird life histories, migration strategies, and population threats with a broad hemispheric focus as well as a local focus on the habitats near Chaplin, Old Wives, and Reed Lakes, SK. It will include techniques for addressing population threats by incorporating shorebird-specific practices into current land management regimes. The workshop will provide an opportunity to learn about shorebird conservation locally and across the Western Hemisphere.

Workshop sessions are designed to bring you the most up-to-date knowledge on shorebird ecology, conservation, and management. The workshop will provide you with a foundation to play a critical role in shorebird conservation at your site and to foster discussion among local land managers and biologists.

This 2.5 day workshop will include classroom and field components.

Sasha Munters

Topics

- Shorebird identification, migration strategies, stopover ecology, reproduction
- Shorebird population and habitat threats
- Shorebird habitat needs, ecological requirements, and site management
- Invertebrates as shorebird food resources
- Population monitoring and estimating shorebird numbers
- Monitoring programs and shorebird conservation initiatives
- Group discussions of management issues

Workshop Leaders

- Brad Winn, Manomet
- Monica Iglecia, Manomet
- Brian Harrington, Manomet
- Lori Wilson, Chaplin Nature Centre
- Christy Morrissey, University of Saskatchewan
- Jordan Ignatiuk, Nature Saskatchewan
